

Herbs

Genovese (pot cultivation)

HI 14 550 HEB

- ▶ basil for year-round pot cultivation
- ▶ flat, slightly dome-shaped leaves
- ▶ horizontal leaf position, easy to pack
- ▶ very robust and upright
- ▶ long shelf life after harvesting

ADRIANA

- ▶ compact growing basil for year-round pot cultivation
- ▶ dark green variety, easy to wrap up due to horizontal leaf position

GUSTOSA

- ▶ Genovese type, especially suitable for pot cultivation
- ▶ very uniform variety with dark green, slightly dome-shaped leaves
- ▶ suitable for year-round cultivation

BALDUR

- ▶ Genovese variety with dark green, shiny leaves
- ▶ very healthy and robust
- ▶ suitable for cutting and pot cultivation in open fields and greenhouses

ATON

- ▶ Genovese basil
- ▶ the dark green leaves are dome-shaped and have an attractive shine
- ▶ suitable for cutting and pot cultivation

Genovese (open fields)

PLENTY

- ▶ Genovese type with a pleasant anise taste
- ▶ high yields, also after multiple harvests
- ▶ robust also under difficult cultivation and weather conditions
- ▶ very suitable for the fresh market and processing

LUNA

- ▶ very insusceptible to cold
- ▶ robust against Fusarium
- ▶ high yields and a good shelf life
- ▶ high regeneration capacity, also suitable for repeated harvesting
- ▶ very suitable for the fresh market and processing

BONAZZA

- ▶ Genovese type with shiny, dark green leaves
- ▶ very robust against fusarium and botrytis, long shelf life after cutting, very good handling and transport capabilities
- ▶ suitable for the fresh market and processing

Small-leaved Basil

PLUTO

- ▶ basil with small leaves
- ▶ well-branched variety with high yield and very aromatic taste

Pluto

Hi 14 550 HEB
